CMS Solution for Norwegian Church Aid's homepage [www.kirkensnodhjelp.no](http://www.kirkensnodhjelp.no)

Norwegian Church Aid (NCA) aims to modernize the website [www.kirkensnodhjelp.no/www.nca.no](http://www.kirkensnodhjelp.no/www.nca.no) and is seeking a partnership with a supplier who can contribute to a comprehensive view of both technical implementation, design, and strategic advice.

NCA desires a cloud-based CMS, improved user experience, better user interface, new functionality, and, in general, a robust code and backend infrastructure that will make NCA more flexible and ready for future innovation and web technologies. Additionally, the organisation is seeking a new modern visual expression in line with its adopted design profile.

The main purpose of NCA'S website is to build the brand, engage and inform about our work, and collect donations from individuals, churches, businesses, and institutions. A modernized website should contribute to increased conversions and optimized user experience. It should also help clarify and strengthen our brand. It should provide greater flexibility to highlight various messages at different times of the year compared to what we currently have.
